IMPORTANT NOTIFICATION

International application No.
PCT/EP2004/053066

International filing date (day/month/year)
23.11.2004

Priority date (day/month/year)
29.01.2004

Applicant
FARMITALY S.R.L. et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

Re Item V

- 1) Reference is made to the following document:

D1: EP-A-0 955 264

- 2) Document D1, which is considered to represent the most relevant state of the art, discloses a corkscrew from which the subject-matter of claim 1 differs in that the elastic means are configured for assisting the angular displacement of the handgrip in the direction of the cork extraction.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

- 3) The problem to be solved by the present invention may be regarded as providing a corkscrew that enables the effort required to pull a cork out of a bottle to be reduced.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) as this solution to the problem is not found nor suggested by the prior art as cited by the applicant and/or in the search report.

- 4) Claims 2 - 15 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
